In response to the Office Action dated November 26, 2002, please amend the above-identified patent application as follows:

IN THE CLAIMS

8. (once amended) A two compartment motor comprising:

a frame;

a first and a second end shield disposed adjacent opposing ends of said frame to define a first compartment;

a stator winding supported by said frame within said first compartment;

an armature rotatably supported by said end shields within said first compartment;

a cover comprising a plurality of cooling openings, said cover mounted to said motor adjacent said second end shield; and

a switchboard mounted to said second end shield to define said second compartment between said switchboard and said second end shield, said switchboard comprising at least one
